PRICE LIST NO. 32 FALL 1986

FOREWARD

Over the last three years, malicious weather has made growing lilies at Honeywood a less-than-satisfying experience. Early winters, poor spring weather, late June frosts and hail have contributed to less-than-ideal growing conditions. Expansion of our plantings and the introduction of new varieties nevertheless continues, albeit somewhat haltingly. Adversity has never meant giving up at Honeywood, so we grin and march onward!

We feature this year, the introduction of five new cultivars of lilies, and are adding to our peony listing to provide better selection. While it was not feasible to issue a coloured catalogue this year, as we did for our Golden Anniversary in 1984-85, we do still have a quantity of the Anniversary issues available. We would urge that you request a copy of this Anniversary issue as a reference for your personal use. It pictures in life's true colours twenty-five of the lilies offered by our company. Please enclose \$1.00 when requesting this coloured issue, and we will reply by return mail.

We are very pleased with the support our customers have given us, and continue to look forward to serving you. Fifty-two years ago, Dr. Porter began Honeywood with a vision to serve horticulture in his community. Over those years, our vision has grown to serving horticulture in Saskatchewan, Canada and indeed, the whole world. We feel that we are capable of managing the responsibilities that this enlarged vision has dictated and dearly appreciate the rewards of our labours.

We hope that some of the tears and perspiration that we have invested in the products in this catalogue will bring you unbounded measures of joy and satisfaction, such as we must admit we too reap from our toils at Honeywood.

INSTRUCTIONS FOR ORDERING

Please order early, enclosing payment. U.S. and foreign customers may remit in Canadian funds. We provide a phytosanitary certificate for export purposes, and if your country requires an import permit to accompany the bulbs, please forward this to us well in advance of your delivery date.

We ship prepaid parcel post all orders of \$130.00 or more. Orders under this amount must include \$3.00 extra to cover postage and handling costs. We also ship Air Mail if requested to do so, and will bill you the extra cost at time of shipment. We do not have access to the UPS system in the U.S.A., sorry.

Shipping season is from early September for peonies, and from late September through October for lilies. Iris and the minor bulbs are shipped in late August.

OUR GUARANTEE

We guarantee safe delivery of all stock, and we will cheerfully replace all material not received in good condition, or that proves not true to variety.

CULTURAL INSTRUCTIONS

All lilies do well in a well-drained, sunny location. They adapt to a variety of soils, but care must be taken if planting them in heavy clays to provide for proper drainage. A handful of sharp gravel at the bottom of each planting hole will ensure the bulb will not sit in water. This will prevent basal and root rots, the cause of many losses in such soils.

Lilies do best in full sun locations, but will perform reasonably well with half day of shade. If these half day regimes are employed, it is best to locate them where they receive afternoon sunlight. This will help them pass into night with no extra moisture on the foliage. Lilies going into night with wet leaves are courting danger. Such conditions are ideal for infection of botrytis. This fungus disease is particularly destructive in wet and humid climate. Fungicides are relatively effective controls and hybridizers are continuing their work breeding resistant varieties. Specifically ask for such varieties and you will have better success.

Lilies will benefit from the incorporation of bone meal, annually applied as a top dressing and worked into the top few centimeters of soil. Nitrogen fertilizers will also enhance foliage growth and colour, but care must be taken to avoid growth that is too lush. This is an open invitation for botrytis to strike.

Soil fertility is most reliably determined by testing it. Proper rates and forms of fertilizer are easily determined from these tests. Avoid the temptation to add that pinch for extra measure!

Depth of planting depends on particular situations. Mostly bulbs are planted with 10-12 cm (4-5 in.) of soil over the bulbs. For additional anchorage in windy locations, this depth can be increased to 15-20 cm (6-8 in.) or perhaps even slightly deeper. Realize however that this deeper planting will slow emergence in spring and may delay the blooming period slightly. This may be used to advantage in areas where late frosts may cause damage.

Mulches are very helpful with lilies. Tree boughs and other loose litter are especially beneficial the first winter after planting lilies to help prevent heaving of the soil. Mulches are also beneficial through summer. They preserve moisture and help keep the soil cool, a condition that lilies prefer. In areas with abundant moisture, low ground covers amongst and around the lilies will add to their attractiveness besides aiding them.

Lilies are best planted and divided after the tops have matured in late fall. This provides time for a new set of roots to grow and anchor the bulbs and ready them for the rapid growth that starts so early in the spring. Spring planting is sometimes practiced, but the planting must be done in very early season before much growth of the sprouts is evident. Spring planted bulbs rarely do as well the first season as those planted the fall before.

In areas with cold winters, such as the northern U.S. and prairie Canada, avoid planting lilies in raised planters. They do not survive the severe fluctuations of temperature that such planters experience through our continental winters and few such planters are properly insulated to prevent this from occurring.

Lilies also require a fair amount of space, and will grow away from heat and shade. Therefore when lilies are used in foundation plantings, or against walls and fences, locate them at least 45 cm (18 in.) from the vertical surfaces. This will prevent the lilies from developing in that particularly unsightly fashion of growing out at 45 degrees to the walls they are trying to escape.

Following these few pointers, you will find lilies very easy to grow and immensely satisfying as garden perennials. Their many forms and colours will help make your yard and garden a true showplace. You will be pleased too with the extra attention they will elicit from all who visit or pass by.

FLOWERING PERIODS

The following table outlines the blooming period for the various lilies in the listing. It is hoped that it will aid you in making your selection of bulbs so as to extend the blooming period over as long a season as possible.

EARLY VARIETIES:

Amabile, 'Bendick', Dalhansonii, 'Dark Gold', 'Earlibird', 'Golden Dauricum', 'Golden Wonder', 'Jolly Miller', Pumilum and 'Rusty'.

INTERMEDIATES:

'Apricot Glow', 'Golden Jubilee', Martagon album, 'Ruby' and Scottiae.

MID SEASON:

'Amulet', 'Black Butterfly', 'Black Velvet', 'Brenda Watts', 'Brown Ivory', 'Burnished Rose', Barber No. 17, 'Cheerful Charlie', 'Cinanmonn Toast', 'Connecticut King', 'Corina', 'Cover Girl', 'Delicious', 'Destiny', 'Edith Cecilia', 'Embarrassment', 'Firebright', 'Flaming Giant', 'Gale's Favorite', 'Geisha Girl', 'Golden Princess', 'Happy Thoughts', 'Honey Bear', 'Honeybunch', 'Honey Queen', 'Jasper', 'Lady Dawn', 'Lemon Drop', 'Lemon Lady', 'Lemon Queen', 'Melody', Michiganense, 'Mount Blanc', 'Orange Light', 'Orchid Queen', 'Pink Charm', 'Polar Bear', 'Porter's Sunbright', 'Primrose Lady', 'Quinella', Raspberry Rhime, 'Red Bird', 'Red Carpet', 'Rochester', 'Rosalind', 'Rose Cup', 'Scarlett', 'Snowbird', 'Snowdrop', 'Sterling Star', 'Summer Night', 'Suntan', 'Susan Eileen', Stroynaya, Tsingtauense, and 'White Picture'.

LATE SEASON:

'Bronze Queen', 'Red Knight', 'Red Velvet', 'Rosabelle', 'Sutter's Gold', 'Towering Turk' and 'White Gold'.

SEASON CLOSERS:

'Golden Age', 'Maxwill', 'Pink Champagne', 'Skydancer' and Yellow Tiger.

NOTES

1986 RE—INTRODUCTION

'DARK GOLD' Lx. Porter. Originally released as 'Dark Glow' in 1960 and renamed in 1965 as 'Dark Gold', this pumilum hybrid has been revived from an old lily bed and multiplied. Selected from 'Golden Glow' as a variant with extremely dark (almost black) stamens and buds, its buds carry a rich reddish tone which open to show a contrasting golden orange face. While we have not offered it for sale since 1973, we believe that 'Dark Gold' remains an excellent lily and revived interest in species and some of their hybrids made us begin propagating it again. Thought almost thirty years old, 'Dark Gold' remains a superior pumilum hybrid. It reaches 18 in (45.5 in) and blooms early with the other coral lilies.

Each...\$9.95

LILY CLASSIFICATION

The lily genus has been divided into a number of groups or divisions to facilitate its classification. The vast majority of the lilies listed in this catalogue fall into Division I; that being hybrids of the Asiatics. Within this division are three classes, these separating all the asiatics by the placement of their flowers. Class 'a' contains all the upfacing flowered varieties; class 'b' the outfacing; and class 'c' the downfacing. Generally the class 'a' types are very popular, especially with people just beginning to grow lilies. They are very showy in the garden and make very attractive specimens as cutflowers, being widely used for this purpose. Generally, however, because of the fewer flowers on the stems, they do have a shorter flowering season than classes 'b' and 'c'. Class 'b' varieties, carrying more flowers per stem, provide a longer season of colour. These too make good cutflowers and well grown single stems of many varieties make perfect bouquets themselves. Class 'c' lilies carry the most flowers of all, but because the flowers are pendant, they do not have the same initial impact. They do have a much more graceful and aristocratic air about them however, so they make very valuable additions to the perennial border. Massed in groups, they make a very powerful impression, and large baskets of these beauties have a charm unspeakable.

Division II lilies are hybrids of the martagon family. Sometimes called the wheel lilies because their leaves are placed in whorls or 'wheels' around the stem, these lilies bear delightful small downfacing flowers with very waxy substance and recurved petals. This flower form has earned the martagons their other nickname: the turk's cap lilies.

Division IX will cover the few remaining lilies in this list that do not fit into the previous two divisions. It encompasses the species lilies, their varieties and forms. It is therefore an extremely variable division and describable only as the individual members.

NOTES

Lilies are best planted and divided after the tops have withered in late fall. This provides time for a new set of roots to grow and anchor the bulbs and ready them for the rapid growth that starts so early in the spring. Spring planting is sometimes practiced, but the plants must be made in very early season before much growth of the sprouts is evident. Spring planted bulbs rarely do as well the first season as those planted the fall before.

In areas with cold winters, such as the northern U.S. and colder Canada, avoid planting lilies in raised planters. They do not withstand the severe fluctuations of temperature that such planters experience through our continental winters and few such planters are properly insulated to prevent this from occurring.

Lilies also require a fair amount of space, and will grow away from heat and shade. Therefore when lilies are used in foundation plantings or against walls and fences, locate them at least 45 cm (18 in.) from the vertical surfaces. This will prevent the lilies from developing in that particularly unsightly fashion of growing out at 45 degrees to the walls they are trying to escape.

Following these few pointers, you will find lilies very easy to grow and immensely satisfying as garden perennials. Their many forms and colours will help make your yard and garden a true showplace. You will be pleased too with the extra attention they will elicit from all who visit or pass by.

NEW LISTINGS AT HONEYWOOD

'CONNECTICUT KING' la. Stone & Payne. This brilliant yellow upfacing lily has been widely used in hybridization and has been the parent of many lovely lilies. It is also a fine garden lily and we are listing it this year specifically for that purpose. 'Connecticut King' blooms in late mid-season and reaches 90 cm (3 ft.).

Each....\$6.00 or 3 for \$16.00

'CORINA' la. De Jong. A vigorous upfacing bold red lily that will add to your early season in the lily patch. 'Corina' does not fade as many other red lilies and is spotted brown in the centre of the flower. It grows to 75 cm (2.5 ft.).

Each....\$7.00

'MOUNT BLANC' la. This lily of Dutch origin is a breath-takingly beautiful soft creamy-white with a few spots in the flower centres. It blooms in mid-season on stems that are 60 cm (2 ft.).

Each....\$8.50

'ROCHESTER' la. Another bright red mid-season lily that really stands out in the lily patch because its buds color well before opening, giving a candelabra effect. Mature stems top 90 cm (3 ft.).

Each....\$6.50 or 3 for \$21.00

'STERLING STAR' la. Oregon Bulb Farms. This lily has become popular very quickly. The white flowers are upfacing and possess a generous sprinkling of fine black spots. While showing a hint of cream close up, 'Sterling Star' make a lovely splash of white in any flower border, and is superior in floral arrangements because of its high bud count.

Each....\$8.50 or 3 for \$21.00

1984 INTRODUCTIONS

'CINNAMON TOAST' la. Porter. This creamy-beige lily has a bold dash of fine spots scattered over its face. Older flowers are a clear ivory and as they are born on a pyramidal inflorescence, they make a splendid garden display and a beauty for cutting. It is a vigorous grower to 75 cm (2.5 ft.) and blooms in early mid-season.

Each....\$20.00

'GOLDEN AGE' la. Porter. The rich golden yellow flowers of this variety are amongst the season closers in the Asiatic class. Dark stems accent the flowers and the presence of stem bulbils make it very easy to propagate. 'Golden Age' grows to 90 cm (3 ft.) and because of its late flowering habit, will make a good variety for growing to show at August flower shows.

Each....\$15.00 or 3 for \$35.00

'SKYDANCER' lc. Porter. This tiger hybrid is the tallest lily we've grown, often reaching 2 meters (6.5 ft.) before the season is through. The downfacing clear yellow brown-spotted flowers can easily be enjoyed because they are born at eye level with most people. It blooms late along with the other tigers, and for all its height, has never shown any wind lodging. 'Skydancer' makes a breath-taking background for other shorter lilies or for other perennials. It will take it two or three growing seasons to reach its maximum height, but has good staying power.

Each....\$10.00

UPFACING LILIES CLASS 'a'

Sold out **'AMULET'** la. Tarlton. An exciting, lively yellow lily. The inflorescence is extended so that the upfacing blooms come one above the other. 'Amulet' has taken the Best in Show in the Canadian Prairie Lily Society Show. Height 75 cm (2.5 ft.).

Each....\$15.00

'DELICIOUS' la. Porter. This variety is noteworthy for its light but pleasant fragrance, that is especially noticeable in the evening. 'Delicious' received an Award of Commendation at the N.A.L.S Show in 1967. Height 60 cm (2 ft.) Medium orange.

Each....\$3.50 or 3 for \$9.00

Sold out **'DESTINY'** la. deGraaff. This yellow lily is more heavily spotted than 'Golden Wonder' and blooms a bit later in July. Height 45-60 cm (1.5-2 ft.).

Each....\$4.50

'FLAMING GIANT' la. Porter. A vigorous lily facing directly upward. The large cup-shaped blooms flare to show the vivid red-orange colour. It has very good substance, blooms in July and makes an outstanding lily for the back of the border. Height to 120 cm (4 ft.).

Each \$5.00 or 3 for \$14.00

'GOLDEN DAURICUM' la. Porter. This is an outstanding dwarf selection. It is a hybrid, but has the Dauricum-type blooms of rich yellow-gold. It blooms early and produces masses of colour in the border after the tulips and irises have finished. Height 45-50 cm (1.5 - 1.75 ft.).

Each \$4.00

'GOLDEN JUBILEE' la. Porter. Our own upfacing golden-yellow lily. Another good early variety with rich colour and good foliage. Height 60 cm (2 ft.).

Each \$3.50 or 3 for \$9.00

'GOLDEN WONDER' la. This lily was sent to Honeywood by a friend many years ago. It is early blooming, in a soft yellow with no spotting. It makes an excellent garden lily and is used extensively here as a cut flower, being so early. Height 60 cm (2 ft.).

Each \$5.00

'JOLLY MILLER' la. Porter. An outstanding early lily to 60 cm (2 ft.). The substance of the flowers is excellent; colour, a very attractive butter yellow. This is a first quality lily for either cutting or garden display. It makes a good clump quickly and will bloom undisturbed for many years.

Each \$4.50 or 3 for \$12.50

'ORANGE LIGHT' la. Porter. One of the most vivid orange lilies in existence. The nearly spotless cup-shaped blooms are almost fluorescent, they glow so brightly. The stems to 75 cm (2.5 ft.) are well clothed with dark green leaves. Award of Merit, 1971.

Each \$4.00 or 3 for \$11.00

Sold out **'POLAR BEAR'** la. Doerr. This dwarf variety was one of the first whites available. It is still one of the most dwarf and produces several lovely star-shaped blooms in a beautiful cream shade that turns clear white in bright sun. Because 'Polar Bear' multiplies so rapidly, it is necessary to lift and divide the clumps every two years to maintain flower size and quality. But your neighbors won't turn you away when you take some bulbs over to share. Height 45-60 cm (18-24 in.). This variety produces quite small bulbs.

Each \$3.50

'REDBIRD' la. Palmer. This older variety has continued to perform well at Honeywood. The bold red spotted flowers are borne on sturdy stems to 150 cm. (5 ft.).

Each \$4.50 or 3 for \$12.50

'ROSABELLE' la. Porter. An unusual deep old rose shade best enjoyed outdoors as indoor lighting muddies the colour. Height 60 cm. (2 ft.).

Each \$4.00

'RUBY' la. Byam. A good deep red upfacing lily to 60 cm (2 ft.). Similar in colour to 'Firebright'.

Each \$4.00 or 3 for \$11.00

'RUSTY' la. Porter. This lily was selected because of its earliness and is one of the first to bloom here. The blooms open almost flat and are a rich rusty-orange fading to a pleasing gold. Height 45-60 cm (1.5-2 ft.).

Each \$4.50 or 3 for \$12.50

'SNOWBIRD' la. Tarlton. This snow white lily will thrill you every time you pass by. It produces a candelabra-type head a shining white blooms with contrasting spots. Each bloom is so placed that it does not over-shadow those beneath it. With the tall inflorescence, it blooms over an extended period in mid-season. Excellent foliage, strong sturdy plants to 90 cm (3 ft.).

Each \$25.00

'WHITE PICTURE' la-b. Porter. This white lily has attracted a great deal of attention from visitors to the nursery. It has shown resistance to basal rot. A vigorous plant to 120 cm (4 ft.). Blooms open wide and are lightly fragrant at times. 'White Picture' can open a rich amber colour in cloudy, cool weather. Under prairie conditions it bleaches in the bud.

Each \$12.00

OUTFACING LILIES CLASS 'b'

'APRICOT GLOW' lb. Patterson. A vigorous lily with blooms up to 18 cm (7 in.) across. Colour is bright apricot.

Each \$4.50

'BARBER NO. 17' lb. Barber. While we were initially much taken with this lily, it developed a few minor problems, so we decided not to name it. It has, however, become very popular in spite of us and we have had trouble keeping up to the demand lately. Its lavender-pink colour is most eye-catching. The blooms have good substance, open flat and have darker centres with some self-colour spots. Height to 75 cm (2.5 ft.).

Each \$5.00

'BLACK VELVET' lb. Mattas. The rich black-red colour of this variety is novel. Each petal and tepal has a stripe of soft orange running down the nectary for a pleasant contrast. Height 60 cm (2 ft.).

Each \$8.00

'BRENDA WATTS' lb. Preston. We would rate this as best of the Preston hybrids. It will reach 120 cm (4 ft.). The partly reflexed blooms are a brilliant grenadine-red with dark brown spots. Even after forty years, this lily remains healthy and vigorous.

Each \$4.00 or 3 for \$11.00

'BROWN IVORY' lb. Patterson. One of his earlier selections, this one has done well here. An excellent garden lily, the plants grow to 120 cm (4 ft.) and bear tall heads of deep amber, brown spotted flowers.

Each \$4.50

'BURNISHED ROSE' lb. Patterson. This lily is of a rich rose tint cast over with copper. It is a tall variety to 150 cm (5 ft.).

Each \$8.00

'CHEERFUL CHARLIE' lb. Porter. A very striking bi-colour; the outer part of the tepals is a rich wine-red, the inner third a creamy yellow that fades to white. The wide open blooms face out and up on 60 cm (2 ft.) stems well clothed with forest green foliage. It lives up to its name, making a cheerful spot where it blooms.

Each \$25.00

'EARLIBIRD' lb. Porter. This lily, earliest in its class, has flowers of clear vivid apricot with fine dark spots toward the base of the petals. It has shown strong resistance to botrytis and has proven to have staying power, being thirty years old. It is one of the few lily that have the ability to continue doing well even with as many as twenty fist-sized bulbs in one clump. Height 75 cm (2.5 ft.).

Each \$4.00 or 3 for \$11.00

'EMBARRASSMENT' lb-c. Simonet. This seedling of Scottiae was obviously pollinated by one of the Patterson hybrids. It grows to 120 cm (4 ft.) or more and bears rich glowing pink flowers. It produces secondary flower buds and we have had stems with as many as fifty blooms on each.

Each \$6.00

'FIREBRIGHT' lb. Porter. A vivid currant-red lily with spotless flowers forming a well-shaped, pyramidal head. The substance is good and the colour does not fade. It is a good propagator and grows to 60 cm (2 ft.).

Each \$4.50 or 3 for \$12.50

'GEISHA GIRL' lb. Porter. This lily resembles 'Lemon Queen', but is more dwarf, reaching only 50-60 cm (20-24 in.). Nice lemony-yellow flowers are borne in rich profusion and make an attractive display.

Each \$3.50

'HONEYBUNCH' lb. Barber. Spotless open-faced blooms in well formed heads make single stems of 'Honeybunch' into bouquets. The flowers are a rich honey shade overlaid with pink, no spots. Height to 90 cm (3 ft.).

Each \$5.00 or 3 for \$14.00

'HONEY QUEEN' lb. Patterson. Growing to 100 cm (3.5 ft.), this delightful lily blooms in a rich honey amber, tipped with rose. It has some self spotting on the basal third of the tepals.

Each \$5.00

'LADY DAWN' lb. Barber. The funnel-shaped blooms of this variety are deep fuchsia with a sharply contrasting cream throat. It is exceptionally beautiful from the time the rich wine coloured shoots emerge to the fading of the last blossoms. Height 100 cm. (3.5 ft.).

Each \$8.00 or 3 for \$22.00

'MELODY' lb. Byam. A very attractive yellow variety that is slow to crowd itself. Height 60 cm (2 ft.).

Each \$4.50

'ORCHID QUEEN' lb. Patterson. The name of this lily comes from its blossoms, that are of such a colouring as to suggest an orchid. The flowers, up to 12 cm. (5 in.) across, have three colour zones. The outer portion of the tepals is dawn pink, the middle zone is straw yellow and the centre is pale shell pink. The colours merge one into the other. Height to 60 cm (2 ft.).

Each \$4.00

'PINK CHAMPAGNE' lb. Porter. This tigrinum hybrid fills the space between the July blooming Cernuum hybrids and the August blooming tiger lilies. The blooms are yellow with an overlay of pink. The pink fades out after a day or two, leaving a clear champagne shade. A good lily for August horticulture shows. Height to 120 cm (4 ft.).

Each \$5.00

'QUINELLA' lb. Hayler. This Australian variety has done fine here. It is an unusual yellow shade carrying a hint of red. Height 90 cm (3 ft.).

Each \$5.00 or 3 for \$14.00

'RED VELVET' lb. Stone and Payne. Exceptional substance makes this lily outstanding. Nearly spotless, the mahogany-red flowers are borne on 120 cm (4 ft.) stems.

Each \$8.00

STROYNAYA lb. This non-registered Russian variety has been extensively used in breeding work. It continues to provide us with very interesting progeny. The flowers are a red-orange, quite well spotted, on stems to 120 cm (4 ft.).

Each \$4.50

'SUMMER NIGHT' lb. Simonet. A unique lily in that its colour is almost black, actually a very dark black-red. The 120 cm (4 ft.) stems carry as many as twelve very long pedicelled flowers. The colour is fade-proof. A must for all who like the dark ones.

Each \$6.00

'SUNTAN' lb. Barber. Rich coppery-bronze with a green nectary. Substance is waxy making a fine lily for floral artist and for use indoors in bronze or copper containers. Height 90 cm. (3 ft.).

Each \$4.50 or 3 for \$12.00

DOWNFACING LILIES CLASS 'c'

'BLACK BUTTERFLY' lc. Simonet. Deep red, almost black pendant blooms make this lily the richest in its class. It is very graceful growing to 120 cm (4 ft.). Award of Commendation, N.A.L.S. 1966.

Each \$4.50

'BRONZE QUEEN' lc. Patterson. This is perhaps the tallest of the Patterson hybrids, reaching 150 cm (5 ft.) or more, with up to thirty or more blooms on a stem. Holds up well to wind. The flowers are an unusual bronzy-yellow.

Each \$5.00

'GOLDEN PRINCESS' lc. Patterson. This hybrid provides us with one of the richest yellow shades in the lilies and joins 'Quinella' in this unusual yellow colour grouping. The strongly reflexed petals together with good reverse colour make 'Golden Princess' outstanding. It will grow to 90 cm (3 ft.) and blooms in mid season.

Each \$5.00

'JASPER' lc. Patterson. This tigrinum hybrid is another of those that seems to have the ability to survive no matter what. Its colour is old rose or jasper, with prominent spotting. Height to 90 cm (3 ft.).

Each \$4.00 or 3 for \$11.00

'PORTER' SUNBRIGHT' (Formerly 'Sunbright') lc. Porter. A bright yellow turkscap lily with a well-formed head. Height 75 cm. (2.5 ft.).

Each \$3.50 or 3 for \$9.00

'RED KNIGHT' lc. Wright. This improved strain of tall, deep red lilies are excellent for massing in the back of the border. Height to 90 cm (3 ft.).

Each \$4.00 or 3 for \$11.00

'SCARLETT' lc. Porter. This Wilmottiae type with spotless reflexed blooms of scarlet-orange suggest a large coral lily, but this one blooms later. Height 90 cm (3 ft.).

Each \$4.00 or 3 for \$11.00

'SUTTER'S GOLD' lc. deGraaff. A delightful lily of good substance in a soft lemon-yellow. The flowers open wide into a cup-shape and display a generously brown-spotted throat. Height 60-90 cm (2-3 ft.).

Each \$5.00

'TOWERING TURK' lc. Wright. A very sturdy plant bearing a good head of deep red turkscap blooms. Height up to 120 cm (4 ft.).

Each \$8.00

'WHITE GOLD' lb-c. Patterson. A very distinctive lily with bold face markings. The pendant blooms open a delicate apricot that soon fades to creamy white. Height to 90 cm (3 ft.).

Each \$4.50 or 3 for \$12.00

MARTAGONS

'BENDICK' II. This variety has performed extremely well at Honeywood. We have been propagating it and now have a few to share. It has mauve-pink sparsely spotted flowers of heavy texture. Height to 120 cm (4 ft.).

Each \$10.00

DALHANSONII II. This has continued to be the most vigorous martagon we grow. It reaches 120 cm (4 ft.) and carries numerous small turkscap flowers of a chestnut brown shade. Very dainty.

Each \$6.00

MARTAGON ALBUM II. This is the white flowered form of the martagon. This one resents being disturbed, and will take several years to re-establish itself after being moved, but the beautiful white blooms with greenish throats and yellow pollen are well worth the wait. Height to 90 cm (3 ft.).

Each \$15.00

DWARF LILIES

Each year we receive inquiries for dwarf lilies, ideal for rockery and border. We are offering the following to fill this need:

'HONEY BEAR' la. Doerr. A small statured plant with large blooms to 15 cm (6 in.) across, in a rich amber-orange shade. Height to 40 cm (15 in.).

Each \$6.00

'RED CARPET' la. Porter. Vivid red, almost spotless upfacing blooms. Increases well. Award of Merit, 1975. Height to 50 cm (18 in.).

Each \$4.50

DWARF COLLECTION

We offer one bulb each of 'Polar Bear', 'Black Velvet', 'Honey Bear', 'Red Carpet' and 'Scottiae' (an unregistered variety that has soft orange-apricot out-facing blooms, the tepals with a beautiful ruffling along the margins.).

5 Bulbs for \$21.50

1986 LILY COLLECTIONS

EXHIBITOR'S COLLECTION: One bulb each of 'Cover Girl', 'Gale's Favourite', 'Raspberry Rhime', 'Susan Eileen', 'Corina' and 'Skydancer'.

\$100.00 Value for \$75.00. Each variety labelled.

HOME GARDEN COLLECTION: These bulbs have been assembled to provide in one package an assortment of fine lilies fully suited to any garden, in a variety of colors, classes and blooming periods. Ideal for someone just starting into lilies or for those who have a difficult time deciding. One bulb each separately labelled of 'Delicious', 'Golden Jubilee', 'Quinella', 'Firebright', 'Jasper' and 'Towering Turk'.

6 bulbs with a value separately of \$28.50 for \$25.00

GOLDEN COLLECTION: One bulb each of 'Golden Age', 'Golden Dauricum', 'Golden Wonder', 'Golden Princess' and 'Dark Gold'.

\$37.00 value for \$32.50

WHITE COLLECTION: One bulb each of 'Happy Thoughts', 'Mount Blanc', 'Sterling Star', 'Cinnamon Toast', 'Snowbird' and 'White Picture'.

\$109.00 value for \$95.00

EARLY COLLECTION: One bulb each of 'Earlibird', 'Golden Wonder', 'Jolly Miller', 'Ruby' and 'Rusty'.

\$22.00 value for \$18.50

HONEYWOOD MIXTURE: 10 bulbs of our re-selected seedling, with good variation in color and form. All excellent garden lilies.

\$25.00

DR. PORTER COLLECTION: We are proud of the work that our Bert has done in the field of lilies, and we believe that he has produced lilies of outstanding quality. He has continually aimed for good garden lilies and so we have assembled a collection of these so that you can grow and see for yourself how fine they are indeed. One bulb each of the following: 'Delicious', 'Flaming Giant', 'Golden Dauricum', 'Golden Jubilee', 'Jolly Miller', 'Orange Light', 'Rosabelle', 'Rusty', 'Earlibird', 'Firebright', 'Geisha Girl', 'Pink Champagne', 'Porter's Sunbright', 'Scarlett' and 'Red Carpet'. Individually \$62.00.

In collection 13 labelled varieties \$50.00

HARDY LILY SPECIES

The species lilies are being constantly improved by garden selection and care. They are even more subtly beautiful than the ones we have crossed and re-crossed. The following are a few that nature has provided for you and me:

AMABILE IX KOREAN LILY. Bright downfacing orange-red waxy blooms with an unfortunate fetid odour. This lily makes a good early July accent. Best planted in groups. Height 75 cm (2 ft.).

Each \$4.50

PUMILUM IX CORAL LILY. One of the earliest to bloom with fragrant pendant flowers in scarlets, oranges and yellows. Easily raised from seed once you have them. Grow to 90 cm (3 ft.).

Each \$4.00

Sold out **TSINGTAUENSE IXa TSINGTAU LILY.** A very bright scarlet-orange lily from China, with very delicate foliage, sometimes variegated. Height 100 cm (3.5 ft.).

Each \$7.50

YELLOW TIGER IXc. The yellow form of *L. Tigrinum*. Unusual and a good garden lily. Height to 90 cm (3 ft.). Yellow Tiger does not make large bulbs.

Each \$7.50

MICHIGANENSE IXa. MICHIGAN LILY. This delightful turkscap is a native of eastern North America, but does very well in our area. The dainty downfacing flowers, 5-8 per stem are a soft red-orange and quite generously spotted with brown. This lily is rhizomatous so be prepared for it to ramble from year to year.

Each \$12.00

HEIRLOOM LILIES

We have many accumulated varieties at Honeywood that are no longer commonly available in catalogues. Although some of them may now be superseded by newer varieties that are of better quality, the older ones still have a fascination all of their own. Some of them were obvious stepping stones in our breeding progress and it's nice to look back at some of these and be reminded how far we have come. We are hearing a great deal these days about the depletion of our genetic reserves with the discarding of old varieties. We are doing our part to stop this senseless march of 'progress'. We are offering the following varieties with brief descriptions:

PATTERSON INTRODUCTIONS:

'Edith Cecilia' lc. Orange buff flushed pink. 90 cm (3 ft.).

'Lemon Queen' lb. Lemon yellow, reflexed petals. 120 cm (4 ft.).

Sold out **'Pink Charm'** lc. Pink with cream centre. 100 cm (3.5 ft.).

'Primrose Lady' Vlc. Primrose yellow, reflexed petals. 120 cm (4 ft.).

'Rosalind' lc. Rose pink. 75 cm. (2.5 ft.).

Sold out **'Rose Cup'** la. Rose with fuchsia and orange. 50 cm (1.5 ft.).

'Snowdrop' lc. White, spotted, yellow green nectary. 90 cm (3 ft.).

SKINNER INTRODUCTIONS:

'Lemon Lady' lc. Yellow spotted black. 100 cm (3.5 ft.).

'Maxwill' lc. Orange-red with some spots. 120 cm. (4 ft.).

HORSFORD INTRODUCTION:

'Lemon Drop' lc. Yellow, some spots. 90 cm (3 ft.).

All above Heirloom varieties \$5.00 each

One bulb each of the ten varieties \$45.00

THE NORTH AMERICAN LILY SOCIETY

If you are interested in lilies, you will find the Yearbook and quarterly bulletins of this society very informative and interesting. They also operate a first-class seed exchange and auction that may well start you on the road to hybridizing. For more information write: North American Lily Society Inc., Box 4786, Waukegan, Iowa 50263.

THE CANADIAN PRAIRIE LILY SOCIETY

This society was formed to encourage lily growers on the prairies. Four newsletters are published each year and we hold a lily show every July, usually in Saskatoon, as well as a fall bulb sale conducted by mail. The annual fee is \$4.00. This may be sent to: Mr. Art Delahey, R.R. 5, Saskatoon, Sask. S7K 3J8.

THE MANITOBA REGIONAL LILY SOCIETY

A sister society to the above, this group serves the Manitoba region, although they welcome members from outside of their area. A very progressive group that holds educational meetings, an annual lily show and a fall bulbs sale among their many activities. For more information, please contact: Mrs. Jean Atto, 580 Bardal Bay, Winnipeg, Manitoba R2G 0J2.

THE ALBERTA REGIONAL LILY SOCIETY

We are happy to welcome our friends to the west into the lily family. Officially organized only a short while ago, this group offers similar services and events to its members that are offered by the forementioned groups. Their newsletter, educational meetings, bulb sales and an annual show are a sampling. For more information please contact: Mr. Terry Willoughby, 9322 - 155th Street, Edmonton, Alberta T5R 1W9.

REGIONAL LILY SHOWS

We have a few other regional shows in our area that would welcome your participation. The Kindersley Horticulture Society in Kindersley, Sask., has organized several very successful shows and we anticipate them to continue their fine work. The Yorkton Horticulture Society also holds a Rose, Lily and Perennial show annually, serving growers and gardeners in the east central region of Saskatchewan and western Manitoba. Congratulations to these innovative groups! Anyone interested in more information about either of these shows may write these societies or contact the Canadian Prairie Lily Society.

HONEYWOOD PEONIES, MINOR BULBS AND IRISES

Unfortunately, because of difficulties in shipping the following across the international boundary, we regretfully must limit orders of the following to Canadian Customers Only.

HONEYWOOD PEONIES

Peonies hold the stage in the perennial border for about three weeks in late June and early July. Give a second choice as some varieties are limited in quantity. Peonies should be planted in full sun. Do not plant too deeply, 3-5 cm of soil over the crown is about right. Deep planted peonies do not bloom well. Planted too shallow, the crowns can be injured over winter. It's a good practice to mulch the first winter with some loose material such as corn stalks, or straw. Large 3-5 eye divisions.

ALBERT CROUSSE: A lovely light rose-pink double, blooming in late mid-season.

Each \$7.50

AUGUSTE DESSERT: Rose pink, semi-double, showing the golden stamens in the centre. A delightful mid-season peony.

Each \$6.00

EDULIS SUPERBA: Early season. Dark pink, tufted centre, very fragrant.

Each \$6.50

EDWARD FLYNN: Brilliant dark red double. Late season.

Each \$6.00

FELIX CROUSSE: The best early light red, very free flowering double.

Each \$6.00

GOLDEN BRACELET: A beautiful peony with a soft creamy base color, accented with a ring of golden petaloids in the centre of the bloom. A mid-season variety, splendid as a cut flower.

Each \$10.00

JEAN COOPERMAN: A medium red double of long lasting quality. A good early variety.

Each \$7.00

KANSAS: Early. Watermelon red, double.

Each \$7.00

KARL ROSENFELD: Double dark red, mid-season. Makes huge plants.

Each \$6.00

KELWAY'S GLORIOUS: A rose scented, double white with an occasional edging of the outer guard petals in a bold carmine red. Mid-season.

Each \$8.00

LAURA DESSERT: Blooms open with pale primrose yellow centres but later fade to white. Should be picked at opening stage. To our mind, the nicest fragrance of any peony.

Each \$7.00

LE CYGNE: A double, white, mid-season sort. Requires support during flowering.

Each \$5.50

LONGFELLOW: Medium red double, mid-season. Strong stems.

Each \$6.50

MADAME EMILE GALL: A very large, double white that stands up well. Late.

Each \$6.00

MADAME EMILE LEMOINE: A white double, that is edged in red, and may also have some carmine flecking in the centre of each bloom. A little earlier and taller than Marie Lemoine.

Each \$7.00

MARIE LEMOINE: A large double white with crimson flecks. Late.

Each \$6.50

MONSIEUR JULES ELIE: Large double deep pink with silvery tips. Very early.

Each \$6.00

PHILLIPE REVOIRE: Our darkest crimson, double, late mid-season variety.

Each \$8.00

RED CHARM: A sensational new hybrid in red, with a bomb of central petals. Early.

Each \$14.00

SAM DONALDSON: A large double red, mid-season, very erect and neat in habit.

Each \$8.00

SARAH BERNHARDT: Our most reliable double pink peony. Early mid-season.

Each \$6.00

THERESE: Double old rose flowers in mid-season.

Each \$7.50

TOURANGELLE: A large delicate pink double peony fading to white. Mid-season.

Each \$6.00

YUKON: A late mid-season double white.

Each \$6.00

SINGLE-FLOWERED PEONIES

Most varieties in this class are very early flowering, possess dissected foliage and make marvellous cut flowers.

PETER BARR: A single bright red, with golden stamens, very early variety, fine foliage.

Each \$8.00

JAPANESE PEONIES

Peonies in this class have single or semi-double flowers, centred with a showy mass of stamens, staminoids or petaloids (the latter two being modified rather distorted structures that are only ornamental) in colors that contrast with the outer petals. Foliage is usually finely divided, but intermediate between the double-flowered peonies and the true fern leaf varieties.

GAY PAREE: Cerise guard petals with cream petaloids. Mid-season.

Each \$15.00

KRINKLED WHITE: White petals with wavy edges, gold stamens.

Each \$15.00

LETO: Pure glistening white with creamy-ivory centre. Early.

Each \$15.00

SWORD DANCE: Deep red guards with rose and golden staminoids.

Each \$15.00

PEONY COLLECTION

One strong division each of 5 doubles in white, pink, red and intermediate shades. Our choice, labelled.

\$25.00

OTHER HONEYWOOD PERENNIALS

FRITILLARIA PALLIDIFLORA: Mission Bells: An extremely early spring blooming bulb with attractive silvery grey foliage topped with a cluster of yellow-green bell-shaped flowers. The plants reach 20-30 cm. The foliage matures and dies early in summer so it does nicely in the annual border providing you cultivate shallowly so as not to disturb the bulb. Overplant with annuals to take over after the leaves wither away. For fall planting.

Each \$3.50

TARDA TULIPS: A very early dwarf miniature tulip with butter yellow cup-shaped blooms about 4 cm across. Blooms early to mid-May and goes dormant quickly after blooming. Small bulbs.

5 for \$3.00 or 10 for \$5.00

Iris bloom between the tulips and the early lilies, so provide colour in the late spring border.

Each \$3.00 except as noted

SIBERIAN IRIS

ALASKA BLUE IRIS: Iris Setosa. A tall growing 60-90 cm iris with long reed-like leaves that serve well as an accent or background in the perennial border. The deep blue flowers are smaller than those of the German varieties, but very showy both in the garden or as cut flowers.

WHITE DOVE: Iris Setosa: A lovely pure white with a splash of yellow in the throat. Like the other Siberian types, it has tall erect foliage that makes a good accent to the perennial border. 45-60 cm.

YUKON BLUE: Iris Setosa: More dwarf than the above, to 30-45 cm. Flowers have narrower purple-blue standards and the white falls are heavily veined in the same bluish shade.

BEARDED IRIS

RHAPSODY: An attractive iris in a two-tone shade of blue and purple. 45-50 cm tall.

LOVE'S DUET: A pretty combination of white standards and lavender falls. 45 cm.

JAUNDA MAROON: A bright iris in yellow and mahogany 30-45 cm.

Each \$4.00

MISCELLANEOUS IRIS

FAIRY'S BUGLE: A spuria-type with tall reed-like foliage to 90 cm, and small dainty flowers in white with soft yellow throats.

Each \$2.50

BANDITO: A dwarf purple bearded variety, extremely early, only 20 cm.

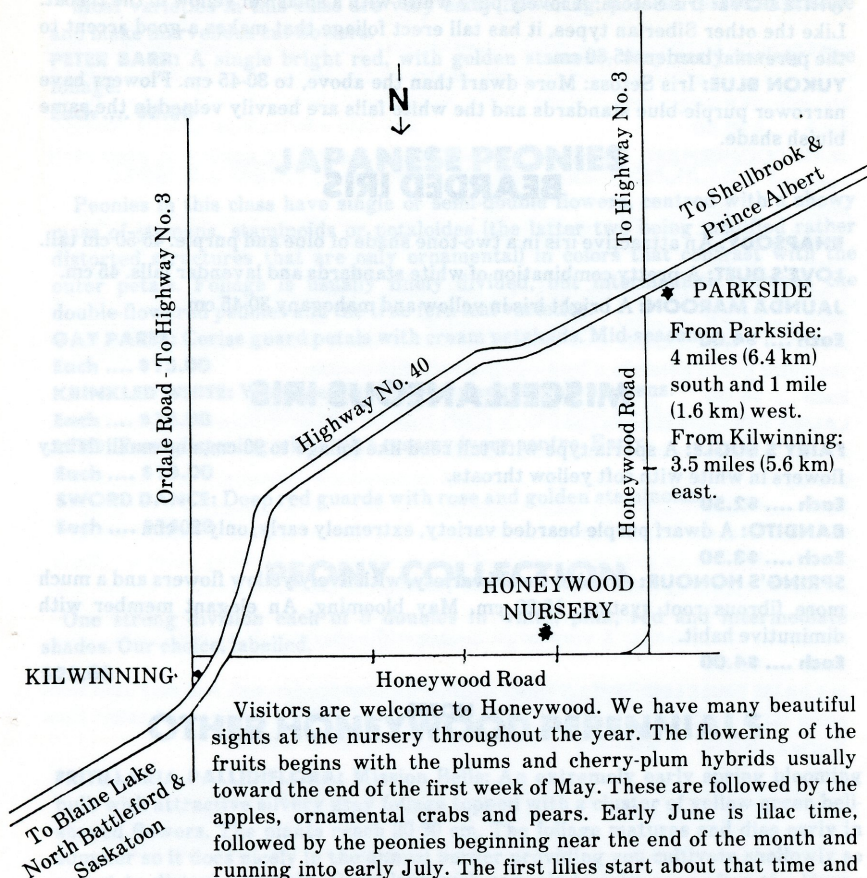

Each \$3.50

SPRING'S HONOUR: Another dwarf variety, with lively yellow flowers and a much more fibrous root system. 15-20 cm. May blooming. An elegant member with diminutive habit.

Each \$4.00

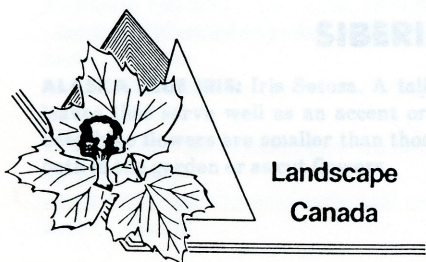

NOTES

HERE IS HOW TO FIND US

Visitors are welcome to Honeywood. We have many beautiful sights at the nursery throughout the year. The flowering of the fruits begins with the plums and cherry-plum hybrids usually toward the end of the first week of May. These are followed by the apples, ornamental crabs and pears. Early June is lilac time, followed by the peonies beginning near the end of the month and running into early July. The first lilies start about that time and bloom through to mid August. The biggest flush of color runs from about the 20th of July to the end of the month, and we are justly proud of our lily fields. The major fruits start ripening from mid August onward and many come to see and sample varieties to help them decide which they will grow.

The nursery is open Monday through Saturday throughout the season. Those wishing to visit on Sunday or coming from distant places, are asked to phone ahead to make an appointment.
